

What is claimed is:

1. A decorative lighting device, comprising:
 - a front panel having a specific design and provided at a predetermined position with a window;
 - a windmill mounted behind said front panel to align with said window; and
 - a plurality of light-emitting elements mounted on said front panel to produce light.
2. The decorative lighting device as claimed in claim 1, further comprising a supporting pike connected to a lower rear part of said front panel for supporting and fixing said decorative lighting device.
3. The decorative lighting device as claimed in claim 1, further comprising a rear plate, said rear plate being located in alignment with said window on said front panel.
4. The decorative lighting device as claimed in claim 3, wherein said windmill is fixed to a front side of said rear plate at a position corresponding to said window on said front panel.
